

BlueControl

Breaks down the complexity

Being user-friendly and intuitive is what the SKOV climate and production controllers have in common. You operate them using a large touch screen with graphic icons.

The BlueControl release includes a brand-new user interface.

Focus on productivity and animal welfare

The user interface is designed for you as a user and a producer with an intuitive user interface. You don't have to be an IT expert to control your production.

Get timely and relevant information

BlueControl is precisely adapted to your production and your information needs,

so you can focus on what's important for you and your animals. Spending time and energy on irrelevant information is a waste of time.

Complete toolbox

We can assist you in finding and utilizing the appropriate tools so you never have to be without them. The controller collects data and converts it into valuable information for your production needs.

Solid basis for decision-making

BlueControl breaks down the complexity and provides an overview and becomes a solid basis for decision-making. BlueControl simplifies the process for you by reducing the overwhelming options and complexity.

The complexity is removed from the equation

You can save time without worrying about intermediate results. The dynamic setpoint removes the need for manual calculations, allowing you to focus solely on the well-being of the animals.

You control - BlueControl
